

MASSAGE OF WELLIS

RELAX MASSAGE SEAT

This seat targets the regeneration of the shoulder girdle and the longitudinal trunk muscle tissues, as well as the hip flexor muscles and the knee extensor muscles — the muscle groups most exposed to everyday strain.

EXPERT MASSAGE SEAT

This seat's adjustable jets offer physiological effects, with customized directional and strength control.

COOL DOWN MASSAGE SEAT

The armchair design provides relaxation after training. In addition to the physiological recovery offered, its overall calming effects are also significant.

FOCUS MASSAGE SEAT

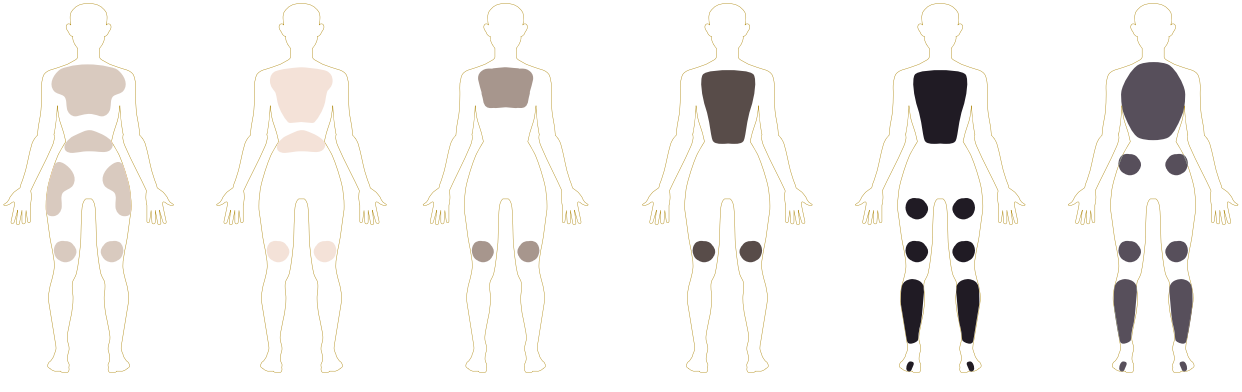

This seat offers its user an experience similar to the "Expert" effect, relaxing the longitudinal trunk muscle tissues, and passively activating the hip and thigh flexor and extensor muscle groups.

BODY FLOW MASSAGE SEAT

This is the massage seat with the most intensive physiological effect. In addition to affecting the trunk's muscle tissue, it also positively impacts venous and lymphatic circulation in the lower limbs, easing pressure on the venous system.

INTENSO MASSAGE SEAT

This is the most refreshing massage seat and is a favorite of professional athletes. Intenso is ideal for recovery after an intense training session, working the most critical areas, the back and leg muscles.

Relax massage | Expert massage | Cool down massage | Focus massage | Body flow massage | Intenso massage

* The layout of the jets varies by model.
