

# ELECTRONIC WATER DIVERTER

## WOW SYSTEM

Our improved electric water diverter replaces the large manual diverter. Our new device performs the same function and comes with a small control panel for ease of use.

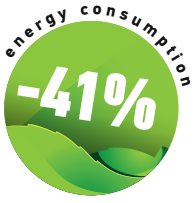

The electric water diverter makes for a gentler massage experience because after activation, the speed of the water increases gradually. Built-in automation creates a new kind of massage experience.

The gradually changing direction of the massage – switching every five seconds – creates a pulsing effect, providing an even more invigorating feel than a traditional massage.

For the water current, we combined the massage strength of two older-model massage pumps in one by straightening the pipes and installing the new water diverter. In this way, in-use energy consumption is cut roughly in half. Wellis' energy-efficient water diverter is patent registered in 152 countries.

PATENTED

Compared to our competitor's solution, it has 23% higher pressure with approximately 30% less energy consumption.

Moreover, we compared it to our previous models, and the results were that it has 75% higher pressure with approximately 41% less energy consumption

**EVEREST with old water diverter**

To reach 12 PSI massage feeling needed:

**2×3HP + 2×2HP pumps and 7400 W**

**EVEREST Life with new diverter**

To reach 12 PSI massage feeling needed:

**2×3HP pumps and 4400 W**
